OBJECTIVITY REPORTS NINE MONTH PROFITS UP 35 PERCENT

- Increased Adoption in the Security and Intelligence Markets Credited -

SUNNYVALE, Calif., (May 3, 2005) - - - Experiencing unprecedented success within mission-critical monitoring, analyzing, reporting and data fusion applications, Objectivity, Inc., the leader in real-time data management solutions for complex inter-related data, today announced results for the nine months ended March 31, 2005. Net revenues for the nine months increased 24% over the corresponding period ended March 31, 2004. Net Income for the nine months increased 35% from the same period the previous year and was the highest ever for the period. Cash balances continued to increase and were 103% higher than at March 31, 2004. "We experienced increased business from the security and intelligence markets and the commercial sectors which over-achieved expectations," according to Jay Jarrell president and CEO of Objectivity. "With the ever growing need for real-time intelligence enabling predictive analysis and decision support we are continuing to expand the proliferation of the Objectivity/DB[®] platform into our targeted government and commercial markets. We are also aggressively building our resource structure to better serve these markets."

Market Successes

Objectivity is expanding its presence in both government and commercial markets through multiple demonstrated successes. The Objectivity/DB platform has experienced significant success within the Department of Defense (DOD), the Department of Homeland Security and the Department of Energy (DOE), which has generated the world's largest database, currently storing 895 Terabytes of information in an Objectivity/DB.

During the year the company also made customer win and deployment announcements covering industry leaders such as financial services providers AWD in Germany and CUNA Mutual in Wisconsin, health sciences supplier Draeger Medical in Germany, and process control leader Siemens Building Systems in Illinois, among others.

GSA Schedule Simplifies Purchase

Objectivity underscored its commitment to the government sector this year with the recent award of its GSA contract which makes it even easier for government agencies to purchase the Objectivity/DB real-time data management solution for mission-critical applications.

A Customer Centric Focus

Objectivity strongly believes in providing multiple venues for customer communications which leads to many new business opportunities. Among the most visible communications channel is Objectivity's WorldView User's Conference. This year's conference brings together industry leaders, experts and analysts to talk about their experiences with data management solutions that manage complex inter-related data and very large databases (VLDBs). The conference's keynote speaker will be Jack Israel, Chief Technology Officer (CTO) for the FBI. WorldView is scheduled for May 17 – May 18, 2005 at the Bethesda North Marriott in Washington, D.C. More conference information and a detailed agenda are available at the Objectivity web site. "We are offering a powerful combination with the Objectivity/DB platform and the industry's most talented object-oriented support team," said Jarrell. "We always look forward to the WorldView User's Conference as our premier open forum for the exchange of ideas and perspectives between ourselves and our customers, strategic partners and constituents."

About Objectivity, Inc.

Objectivity, Inc. is the leading provider of real-time data management solutions for complex inter-related data. The company's flagship product, Objectivity/DB, manages and analyzes very large volumes of complex data for event and relationship processing within mission-critical applications. These applications are developed by ISVs, OEMs and end-users in process control, medical and telecommunications equipment, government, ontology, financial services, and knowledge management. Objectivity/DB enables organizations to monitor, analyze and respond by identifying inter-relationships or anomalies providing real-time intelligence for predictive analysis and decision support.
