Booths #1 & 2

For Immediate Release

**OBJECTIVITY JOINS “BEST OF BREED” CONSORTIUM PARTICIPATING
AT THE ANNUAL EUROPEAN DEFENSE GEOSPATIAL INTELLIGENCE
(DGI 2006) CONFERENCE**

*- Objectivity, Inxight, SML, Scisys and SUN create a “Best of Breed” consortium
addressing the challenges of “Multi-INT Fusion for Decision Superiority” -*

SUNNYVALE, Calif., (January 19, 2006) - - - With the continued demand from the security and intelligence community for its real-time data management solutions for complex inter-related data, Objectivity, Inc. today announces they will be participating in the DGI (Defense Geospatial Intelligence) conference as part of a consortium of companies. The DGI 2006 Conference will be held at the QEII conference centre in London from January 23rd to the 26th. The consortium of companies that Objectivity is participating with will be showing their combined framework solution during the conference at Booths #1 and 2. DGI is the annual European event for the Military Geospatial Intelligence community, bringing government, industry, and military leaders together with leading suppliers and industry experts. The focus of this year’s conference is “Creating Superior Defence Intelligence Capabilities: Taking GeoINT From The Niche To The Universal”.

“Best of Breed” Consortium

The “best of breed” consortium of companies is comprised of five members including Objectivity, Inxight, SML, Scisys and SUN Microsystems. Together these companies are exhibiting and demonstrating their combined “Multi-INT Fusion for Decision Superiority” framework solution for attendees of the DGI 2006 conference. The consortium will

demonstrate their solution to the challenge of enabling effective operational decision-making via a single logical view of multiple, distributed and disparate sources of complex sensor and other intelligence data.

Within this consortium Scisys, as a primary systems integrator, is combining the “language intelligent” unstructured data-mining capabilities of Inxight’s SmartDiscovery with the scalable storage and retrieval of arbitrarily complex data from the Objectivity/DB platform, together with 3-D geographic visual interfaces from SML RealityMap and the compute power of SUN Microsystems hardware. These individually very powerful technologies are now combined to create a unique and powerful consortium “framework” for solving these important Effects-based operations problems.

“Objectivity is pleased to participate in this “best of breed” consortium at DGI 2006,” said Jay Jarrell president and CEO of Objectivity, Inc. “It is important for security and intelligence agencies to know about a turnkey framework solution that address their mission-critical needs.”

New U.K. Office Services the Government

Objectivity continues to expand its international presence with last year’s announcement of the new U.K. office. The Objectivity U.K. office manages sales operations for the entire European region including the government in the U.K. The office is located at Charwell House, Wilsom Road, Alton Hampshire, GU34 2PP United Kingdom and can be reached at +44 7808 289001 or +44 1420 564022.

About The DGI 2006 Conference

DGI (Defense Geospatial Intelligence) is the annual European event for the Military Geospatial Intelligence community, bringing together government, industry, and military leaders with leading suppliers and industry experts. At this second annual conference, attendees at DGI will experience an information packed 4 days of accurate, timely and cutting-edge military case studies, delivered by more than forty geospatial intelligence leaders from the world’s MoD’s, Government Agencies and NATO. The theme of this year’s conference is “Creating Superior Defence Intelligence Capabilities: Taking GeoINT From The Niche To The Universal”.

Attendees include Directors, Analysts and Project Managers from Geospatial, Intelligence, Joint Staff, C2, ISTAR, as well as Procurement and Operations departments from across the world.

The key topics for the DGI 2006 conference will cover:

- Benchmarking the real impact of geospatial intelligence upon operations
- Multi-INT Fusion
- The role of geoINT to NEC/NCW
- Interoperability
- Web-Services

Registration is open and may be accessed by visiting <http://www.wbr.co.uk/dgieurope> to register for the DGI 2006 event online.

About Objectivity, Inc.

Objectivity, Inc. is a global technology leader in data management products and services for software applications with the most demanding data management challenges. The company's flagship product, Objectivity/DB is the leading object oriented data management (OODB) platform for the real-time management of complex inter-related data. Objectivity/DB is recognized for its ability to store and manage very large volumes of complex data for event and relationship processing within mission-critical applications. These applications are developed by ISVs, OEMs and end-users in process control, medical and telecommunications equipment, government and financial services. Objectivity/DB enables organizations to monitor, analyze and respond by identifying inter-relationships or anomalies providing real-time intelligence for predictive analysis and decision support.

Objectivity, Inc. is headquartered in Sunnyvale, Calif., USA. Please contact the company by sending e-mail to info@objectivity.com, visiting at www.objectivity.com or calling (408) 992-7100. In the U.K., call Russell Prince-Wright at +44 7808 289001. Objectivity/DB 9.1 is available on a 30-day FREE TRIAL basis at www.objectivitydownload.com.
